## SKILLS

### FRONT END

- HTML 5
- CSS 3
- Bootstrap 5

### DEV TOOLS

- Git / Github
- Visual Studio 2022
- VS Code
- SSMS
- Postman
- Swagger

### BACK END

- C# / OOP
- .NET Core 6.0
- SQL Server 2022
- SQLite
- Dapper
- Entity Framework
- Azure
- Authentication & Authorization

### PROJECT TYPES

- Web API
- Blazor Server
- Angular
- Class Library
- WinForms
- Console

## EDUCATION

[Brightpoint Community College](#)

**AAS - INFORMATION TECHNOLOGY,  
PROGRAMMING**

2022 - Present, Graduating Spring 2024

## ABOUT ME

I am pursuing a career in Software Development as I study at Brightpoint Community College. Personable and dependable. A team player with an eye for detail.

## EXPERIENCE

### PERSONAL PROJECTS

#### CulinaryShares Angular

*Technologies Used:*

- Bootstrap 5
- Angular Components
- RxJS
- Azure AD B2C
- OAuth 2.0
- OpenID Connect

This app allows people from around the world to share recipes. Users can create an account, sign in, edit their profile, share recipes, favorite recipes and explore other users' shared recipes.

[Check it out!](#)

#### CulinaryShares Blazor Server

*Technologies Used:*

- Bootstrap 5
- Razor Components
- Razor Syntax
- Azure AD B2C
- OAuth 2.0
- OpenID Connect

This project is a clone of the CulinaryShares Angular project built with Blazor Server.

[Check it out!](#)

#### CulinaryShares Web API

*Technologies Used:*

- Data Access Class Library
- Dapper w/ stored procedures
- Azure SQL Server
- Secure endpoints
- OAuth 2.0

This solution consists of two projects, a class library for data access and a Web API. My data access library utilizes dapper with stored procedures. The API is then consumed by my Blazor/Angular apps. For more info check out the [postman documentation](#).
