SKILLS

FRONT END

- HTML 5
- CSS 3
- Bootstrap 5
- Currently learning Javascript & React

DEV TOOLS

- Basic Git / Github
- Visual Studio 2022
- VS Code
- SSMS
- Postman
- Swagger

BACK END

- C# / OOP
- .NET Core 6.0
- Web API
- Blazor Server
- SQL Server 2022
- SQLite
- Dapper
- Entity Framework
- Azure
- Authentication & Authorization

OTHER SKILLS

- Microsoft Office
- Documentation
- Networking
- PC Hardware
- Windows OS
- Software Installation

ABOUT ME

I am pursuing a career in Software Development as I study at Brightpoint Community College. Personable and dependable. A team player with an eye for detail.

EXPERIENCE

PERSONAL PROJECTS

[Recipes Blazor Server App](#)

Technologies Used:

- Bootstrap 5
- Razor Components
- Azure AD B2C
- OAuth 2.0
- OpenID Connect

This project was made to consume my web api. It features server-side paging for recipe searching. For more info check out my portfolio with a short demo video.

[Recipes Web API Solution](#)

Technologies Used:

- Data Access Class Library
- Dapper w/ stored procedures
- SQL Server
- Secure endpoints
- OAuth 2.0
- ILogger

This solution consists of two projects, a class library for data access and a RESTful Web API. My data access library utilizes dapper with stored procedures. The api is then consumed by my blazor server app. For more info check out the repository.

EDUCATION

**AAS - INFORMATION
TECHNOLOGY, PROGRAMMING**
