- SQLite
- Dapper
- Entity Framework Core
- Authentication & Authorization

DEV TOOLS
- Git / Github
- Jira
- Visual Studio
- VS Code
- SSMS
- Postman / SoapUI

PROJECT TYPES
- Web API
- Angular
- Blazor Server
- Class Library
- WinForms
- Console

EDUCATION

Brightpoint Community College

ASSOCIATE OF APPLIED SCIENCE INFORMATION TECHNOLOGY, PROGRAMMING

August 2022 - August 2024

ABOUT ME

Hello! I'm a junior Software Developer with 2 years of experience in building .NET and Angular applications. I graduated from Brightpoint Community College in August of 2024.

EXPERIENCE

Professional

Intact Insurance Specialty Solutions - Software Development Intern

June 2024 - Present

- Developed and maintained web applications using Angular and .NET.
- Collaborated with the IT/software team to implement new features and fix bugs.
- Utilized Git for source control and collaboration.
- Participated in code reviews and contributed to the team's code quality improvements.
- Attended daily stand-ups, sprint planning, and retrospectives to discuss progress, plan tasks, and review completed work.

Personal

CulinaryShares Web API

Technologies/Libraries Used:

- Deployed on Azure Web Apps
- Data Access Class Library
- Dapper w/ stored procedures
- Azure SQL Server

This solution consists of two projects, a class library for data access and a Web API. The API is consumed by my Blazor/Angular apps. For more info check out the *postman documentation*.

CulinaryShares Angular

Technologies/Libraries Used:

- Deployed on Azure Static Web Apps
- Bootstrap 5
- Azure AD B2C

Users can create an account, sign in, edit their profile, share recipes, favorite recipes and explore other users' shared recipes.

Check it out!

CulinaryShares Blazor Server

Technologies/Libraries Used:

- Deployed on Azure Web Apps
- Bootstrap 5
- Azure AD B2C

This project is a clone of the CulinaryShares Angular project built with Blazor Server.

Check it out!
